

MAYCOCKS TERRACE 129

 Saint Lucy, Barbados

This spacious back-split home built in 1988 offers a well-designed layout with excellent potential for modernization and personal touches. Featuring three generously sized bedrooms, each with its own en-suite bathroom and walk-through cupboard area, the home provides both comfort and privacy for family living or guests. While the bathrooms would benefit from some upgrading, they present a great opportunity to create stylish, modern spaces.

Upstairs, two large bedrooms enjoy elevated positioning, offering a sense of retreat. On the main floor, the third bedroom is conveniently located alongside an inviting entertainment or formal sitting area at the entrance—ideal for hosting guests or creating a welcoming first impression.

The lower level opens into a generously proportioned kitchen that is ready for modern updates, allowing you to design the heart of the home to your taste. Adjacent is a practical laundry room with its own exit door for added convenience. The expansive living and dining area flows seamlessly onto a covered patio, creating a perfect setting for indoor-outdoor living and entertaining.

At the rear of the property, two mature avocado pear trees and a cherry tree add a touch of natural charm, while approximately three-quarters of the property is enclosed, offering privacy and security. This home is a fantastic opportunity for those looking to invest in a property with solid structure and the potential to elevate it into a beautifully updated residence.
